Spring 2020 Catalogue

This is a compact version of our full catalogue, to give you an introduction about our concept and show you the newest series.

We maintained the success formula of the best selling 2019 series: thick and high quality glass, profound colors in elegant yet sober shapes. Some series were spiced up with a touch of gold.

CONTACT

WHO?

The 3 founders (Finland, Spain, Belgium), partially based in China, have expertise in design, product development, marketing and manufacturing. It's their passion that united them to create the brand.

WHAT?

A brand of high quality decoration items, developed or designed in-house, around the concept of "elements". Four collections: glass, ceramics, tableware and lanterns.

WHY?

To bring affordable yet superior design elements to homes. Through professional analysis and business savvy rational solutions, grow to a leading player in the market.

HOW?

Understand the needs of the market, answer with the right products, logistics and services. Develop through a reliable network of sales partners around the world.

WHERE, WHEN?

Since 2018, started in Shanghai, exporting from China. Get in touch with us to learn how to become our sales partner or where to buy our products.

YOUR
HOME

Spring 2020's new series are:

ALAIN

A solid foot merging over to a conical bowl and disc.

BADEN

Unparalleled vertical circles

CUZCO

A modern interpretation of Inca's graphic art, lead to an wonderful vase.

TRIER

A cylinder with a golden belt

ORURO and ROCHA

A ball made into a vase

OMAHA

Cylindrical shapes standing gracefully.

TYLER

American Art Deco shapes,

three main colors of our thick glass:

Ink Blue
IB

GRAY
GR

GREEN
GE

Our deep blue is best-seller of 2018.
Blue is 2020 color of the year.

The gray we use in glass has a slight
touch of brown in it, easy match.

Our green glass has a deep tone, typical
also for Art Deco styles.

The products we show here are all made of glass. We only used the highest quality glass, with a thickness that gives extra value to each vase. Let your eyes sink away in the deep shades of the colored clear glass.

From sand as main raw material, formed by heating it up to about 1700°C. in a furnace. Giving it the right color is a very delicate process. Designers like glass because it allows almost any shape to be formed, it's smooth and usually shiny surface. The quality of glass depends on the raw materials and the equipment used, then also the labor that goes into obtaining the required product. There are many kinds of glasses for different usages, for vases purity, clarity and thickness will determine the cost.

Earth is one of the world's 4 basic elements. It's from the earth we get the clay to make ceramics. Selecting good clay is a first very important step of the long manufacturing process. The shape is made with the use of moulds, and it requires hand labor to apply the clay thoroughly and cut off the edges, one piece at the time. The temperature and capacity of the furnaces are also very differing in achieving a perfect result.

The first series of ceramics by Element Accessories are a mix of trendy and classic forms. The color and finishing are not less important.

The tableware series of Element Accessories were manufactured for professional use, and thus very resistant and safe. Each series comes with many models for various use like plates, cups, bowls, bottles, cups, spoons... in different sizes.

The designs all have a natural feeling, some shapes are like hand made. The latest trend is to use 2 or 3 different colors, with the edges in a different color.

Light is not part of the classic 5 elements of nature. Without light we would not see shape or color.

We have developed a series of lanterns, made of vines and wood or metal. These make ideal decorative items to mix with plants or as an accent in some empty corners.
